In order to yield a perfect result every time, BRAZILIAN BLOWOUT stylists should always follow the manufacturer instructions and pay attention to detail. This ensures that you not only perform the treatment correctly, but will eliminate product waste and, most importantly, deliver the results that meet your clients’ expectations.

### 1 shampoo

Introducing our brand NEW! Professional Ionic Cleanser - removes build up & impurities in one wash.
- Generously spray Professional Ionic Cleanser throughout soaking wet hair and scalp and massage vigorously until a foam begins to form.
  - Thoroughly rinse
  - For extremely thick, curly more resistant hair or, for heavy buildup, repeat

### 2 towel dry

Towel dry hair to remove excess moisture
- Moisture is needed to help spread solution without over saturating
- Use a spray bottle if hair dries during the service to re-wet hair
- Hair should be damp, not dripping wet

### 3 divide hair

Divide hair into 4 even sections
- Start from the base of the head and work your way to the top
- Use a wide tooth comb to section the hair, start from the base of the head and work your way to the top

### 4 measure solution

LESS IS MORE
- Always shake the bottle of Brazilian Blowout Professional Smoothing Solution before dispensing product
- Measure solution and pour into color bowl
  - Short hair: ¼ oz. to ½ oz.
  - Medium hair: ½ oz. to ¾ oz.
  - Long hair: ¾ oz. to 1 oz.

### 5 application

Start with a 1/4 to 1/2 inch section from one of the back quadrants (section size will vary depending on hair density)
- Using the applicator brush, lightly dust solution on the section and comb it through hair, working from root to ends - Apply solution directly to the root - NOT the scalp

NOTE: DO NOT SATURATE THE HAIR. If too much product is applied, pull down the next section of hair and comb through. Repeat until solution residue is no longer visible.

IMPORTANT: Stylist should wear gloves and both stylist and client should wear protective eyewear until product is rinsed from the hair.

### 6 blow dry

Blow dry hair as sleek and smooth as possible and 100% dry
- Use Brazilian Blowout Round Boar Bristle Brush (or similar boar bristle brush)

### 7 flat iron

- Flat iron in ¼ to ½ inch sections on average
- Use a minimum temp of: 380°F & a maximum temp of: 450°F based on the integrity of the hair and desired results
- Flat iron hair from roots to ends using the same tension and pressure all the way down the hair shaft, easing up through the ends
- Flat iron instructions for different hair types to seal in the treatment:
  - To transition from relaxed hair to natural, there should be NO tension and NO pressure all the way down the hair shaft while flat ironing each section 4 to 5 times at 380°F
  - To keep natural hair texture, flat iron each section at least 4 to 5 times at 400°F
  - To loosen the curl, flat iron each section 7 to 12 times at 430°F
  - To create a smoother sleeker appearance, flat iron each section 14 to 16 times at 450°F
  - To maintain or create volume, over direct your flat iron along the way down the hair shaft,

NOTE: Please take into consideration any previous chemical services and the integrity of the client’s hair when selecting flat iron temperatures.

### 8 rinsing

Completely rinse solution from hair - DO NOT leave solution in hair
- Use warm water, rinsing for 1-2 minutes
- For clients wanting to keep natural texture, scrunch the hair to bring back curl pattern
- Do NOT shampoo

### 9 apply masque

Apply Brazilian Blowout Açai Deep Conditioning Masque
- Leave in for about a minute, then rinse thoroughly

### 10 finishing

- We recommend using a small amount of Brazilian Blowout Açai Daily Smoothing Serum or Brazilian Blowout Açai Thermal Protective Straightening Balm starting at the ends and working up, then blow dry and style as desired
- For clients who want to keep their curl or natural styles apply Brazilian Blowout Açai Daily Smoothing Serum or Brazilian Blowout Açai Thermal Protective Straightening Balm and diffuse hair
- Client can now resume daily activity including: exercising, swimming, putting hair in a ponytail or clip etc.
MAINTENANCE

It’s important that each one of your clients leave the salon with Brazilian Blowout Açai Aftercare products after getting a Brazilian Blowout. These products infuse hair the Brazilian Super-Nutrient Complex™, prolonging the longevity of a Brazilian Blowout.
